GENERAL DESCRIPTION

The BITalino MuscleBIT bundle is designed for everyone who wants to measure muscle activity by evaluating electromyography (EMG) signals. This bundle is completely assembled with our 3D Printed Casing for BITalino (r)evolution Plugged making it more convenient to use, wearable, sharable & transportable. The four Assembled Electromyography (EMG) Sensors with SnapBIT-DUO allow repeatedly accurate & fast measurements, once the user can benefit from the pre-fixed electrode distance, 1-lead cable for each sensor (instead of 2-lead or 3-lead cable) and one reference cable for all sensors connected.
